[Irzi Rahmatullah](#)

[zaxchaxs](#)

I am an active computer science student with approximately one year of experience in software engineering, particularly focused on web development. I have a strong foundation in modern web technologies, including React (Next.js), Express.js and MySQL. Currently, I am passionate about building user-centric applications that address real-world challenges, such as mental health solutions and financial management tools. My academic background and hands-on projects have equipped me with the skills to design, develop, and deploy efficient and scalable web applications.

EXPERIENCE

Freelance Web Depeloment

Jun 2024 - Present

Developed web applications using React as the main technology stack. Built and optimized web applications for performance and scalability. Collaborated with clients to define project requirements and deliver tailored solutions.

- Building Geopark Indonesia website as a fullstack developer.
- Contributed to developing the Regional BAPPENAS website as a front-end developer.

EDUCATION

BACHELOR OF COMPUTER SCIENCE

2023 - Present

University of Singaperbangsa Karawang

- Laboratory Assistant. Provided instruction and facilitated learning during university practical sessions.
- Specialization in Advanced Manufacturing.
- Participating in various activities involving technology, committees, and taking courses related to programming

MATHEMATICS AND SCIENCE

2020 - 2023

SMA Negeri 1 Ciampea

- Actively participate in various activities at school, for example taking part in extracurricular activities, taking part in competitions, and being part of committees.

TECH STACK

- JavaScript
- TypeScript
- Express/Node
- React JS
- Next JS
- MySQL
- Firebase (Firestore)
- Git Version Control

OTHER SKILLS

- **Communication:** Able to clearly articulate technical concepts to both technical and non-technical stakeholders.
- **Problem Solving:** Skilled in identifying issues and developing creative solutions within tight deadlines.
- **Collaboration:** Experienced in working within teams, leveraging diverse skill sets to deliver high-quality projects.
- **Adaptability:** Quick to learn and implement new technologies and frameworks to meet project needs.
- **Attention to Detail:** Meticulous in writing clean, maintainable, and efficient code, with a focus on usability and performance.
- **Time Management:** Capable of balancing multiple projects simultaneously while ensuring timely delivery.
